

DENIS WICK PRODUCTS

www.deniswick.com

Denis Wick makes one of the largest ranges of accessories for brass instruments available in the world today. He achieved a worldwide reputation as both a player and teacher and has used his vast experience and knowledge to create mouthpieces and mutes which have become the favourites of brass players all over the world.

Denis Wick uses both the latest in computer-controlled technology and traditional hand-crafting skills to produce a range of accessories that are designed to give the best possible results. All **Denis Wick** products are thoroughly trialled and tested by leading players, and are used in the finest orchestras and bands across the globe.

The first **Denis Wick** mouthpieces were made in 1968, and range has grown so much, that it is now one of the largest and most comprehensive in the world. They are famous for their wonderful sound and brilliant designs, and are produced to the highest technical specifications. Special attention is paid to the rims, which are both comfortable and consistent. Special techniques are used to produce beautiful and extremely hard-wearing silver and gold plating. Many mouthpieces are available in **Heritage** and **Heavytop** formats as well as in the **Classic** shape.

Denis Wick mutes have set the standard for tone and intonation for many years. They bring an amazing range of tone colours to any brass section and are essential for the performance of a huge range of music, from classical composers such as Mahler and Shostakovich to film scores, avant-garde music, big bands and small group jazz. The popular trumpet straight mute (DW5504) has set a standard which has been widely copied but never

equalled. The hand crafting of these mutes gives the high-quality aluminium a 'work-hardened' quality, which makes for a very resonant product that will give a wonderful fortissimo when it is needed. It also has the best intonation of any trumpet mute available. The hand-made wooden mutes are especially effective in quiet, spooky music and are widely used in orchestras for the performance of early twentieth-century music. All **Denis Wick** mutes are designed to work in all registers, so even the very difficult low notes of the bass trombone work perfectly whichever **Denis Wick** mute is being used.

Denis Wick accessories provide brass players with many practical items for cleaning and maintaining their instruments. **Denis Wick Advanced Formula Valve Oil** uses **PTFE** to create perhaps the best oil on the market today. It is very fast and has a silky feel, and regular use will ensure trouble-free valve action, protection from corrosion, and a long life for your instrument. Other accessories include mouthpiece and instrument brushes, a transposing tuner/metronome, polishing cloths and mouthpiece adaptors.

The 5 major components to every mouthpiece:
Rim, Cup Depth, Cup Diameter, Throat and Backbore

MOUTHPIECES

cup diameter (mm) **rim width (mm)** **bore (mm)** **backbore** **description**

All sizes also available in the Heritage Series 3181

		cup diameter (mm)	rim width (mm)	bore (mm)	backbore	description
2	Deep cup	17.00	4.92	4.572	open	Enormous solid cornet tone for low cornet parts - sounds like medium bore trombone
2B	Medium cup	17.00	4.88	4.3	V-type	For strong soloists - more brilliant than 2
2BW	Same with wide rim	17.00	5.50	4.3	V-type	
3	Deep cup	16.75	5.00	4.6	open	Used by soloists with very strong embouchures - very rich tone
3B	Medium cup	16.75	5.00	4.3	V-type	Like 2B but more brilliant. Very flexible. Ideal soloist's choice
4	Deep cup	16.50	5.13	4.6	open	The perfect cornet mouthpiece. Rich and powerful tone. Favoured by S.A. bands
4W	As above with wider rim	16.50	5.50	4.6	open	As above
4B	Medium cup	16.50	5.13	4.3	V-type	The most popular model. Rich tone with easy and brilliant high register
4BW	As above with wider rim	16.50	5.50	4.3	V-type	New model
4.5	Deep cup	16.40	5.18	4.5	open	Like No. 4 but easier to play (smaller bore)
5	Deep cup	16.00	5.30	4.5	open	Scaled down version of No. 4
5B	Medium cup	16.00	5.30	4.0	V-type	Brilliant high register. Good for soloists
S	Shallower cup	16.00	5.30	4.1	open	Designed for Eb cornet. Good intonation. Fantastic high register
RW2	Deep cup	17.00	4.88	4.6	open	Internationally acclaimed cornet player, Roger Webster, has specially designed this range of cornet mouthpieces which are made to the traditional high quality Denis Wick craftsmanship and finish
RW2B	Medium cup	17.00	4.88	4.3	V-type	
RW3	Deep cup	16.75	5.00	4.6	open	
RW3B	Medium cup	16.75	5.00	4.3	V-type	
RW4	Deep cup	16.50	5.13	4.6	open	
RW4B	Medium cup	16.50	5.13	4.3	V-type	

Denis Wick has revolutionised the world of cornet playing and has helped to bring about a real difference between cornet and trumpet sounds. Carefully worked out cups, throats and bores have given today's superbly talented young players opportunities that were simply not available to earlier generations. The richness, sweetness and flexibility of modern cornet playing, so much a characteristic of the best brass bands are attributable to the careful research which Denis Wick has done in cornet mouthpiece design.

The British virtuoso euphonium player, Steven Mead, has co-operated in the subtle design modifications needed to make the finest range of euphonium mouthpieces available in the world today. Although they are all based on the well worked principles of the Denis Wick trombone mouthpieces, they all offer small but significant refinements which make them the choice of the best euphonium players.

French Horn

4885 Gold Plate

cup diameter (mm) **rim width (mm)** **bore (mm)** **backbore** **description**

comparison

4	Deep cup	18.00	5.00	4.70	barrel	Enormous volume and range with support from a wide rim. Good for 2nd and 4th, but can be used by strong embouchures for 1st parts	
4N	Deep cup	18.00	3.93	4.70	barrel	As above with conventional narrow rim	
5	Shaped funnel	17.50	4.95	4.6	barrel	For 1st and 3rd players. Clear, smooth and rich sound. Good for beginners. Wide rim.	Alex 8L (wider rim) Paxman 4B
5N	Shaped funnel	17.50	3.90	4.6	barrel	As above with conventional narrow rim	Alex 8L Paxman 4B (deeper cup)
6N	More rounded cup	17.25	3.88	4.50	barrel	American type, versatile, OK for beginners, but with big professional tone quality. Narrow rim.	Paxman 3B Holton Farkas MDC
7	Medium cup	17.00	4.50	4.50	barrel	Easy high register. Solid sound and excellent flexibility. Medium-wide rim	VB 7 (wider rim)
7N	Medium cup	17.00	3.85	4.50	barrel	As above with narrow rim	VB 7

The world of the horn is different in every way from that of the other brasses. Traditionally, very narrow rims were used which made the instrument unnecessarily difficult. Horn players often dug the rim into the bottom lip, "einsetzen". For some of the more modern players, the other type is with 5mm wide rims to give additional support if needed. Young musicians have found that they can easily transfer to the horn after having played trumpet, for instance.

Trombone

4880 Gold Plate

6BL	Large Bore Trombone	25.40	6.26	6.66	V-type	All-round best seller. Good in all registers	VB6½AL:Schilke 51
6BS	Medium Bore Trombone	25.40	6.26	6.66	V-type	All-round best seller, as above	As above. Small fitting
7CS	Medium Bore Trombone	25.40	6.26	6.24	medium	Super efficient. Fantastic high range	VB6½A:Schilke 47. DW better all round
9BL	Large Bore Trombone	25.00	6.46	6.66	V-type	Small but sonorous for very good high register	VB6½A:Schilke 47. DW smaller with bigger sound/large fitting
9BS	Medium Bore Trombone	25.00	6.46	6.66	V-type	Perfect mouthpiece for beginners	As above
10CS	Alto/medium bore Trombone	25.00	6.46	6.24	medium	Jazz and alto trombone. Even tone quality in all registers	VB old 11C:Schilke 46
12CS	Medium Bore Trombone	24.50	6.71	6.10	V-type	Excellent jazz model, rounded rim contour	VB12C

The entire Denis Wick range of mouthpieces began with a mouthpiece conceived to suit the needs of the London Symphony trombone section playing in the unhelpful acoustic of the Royal Festival Hall in the 1960s. This original design (now the 4AL) has remained popular, but has generated many other types, each of which is made to fulfil a specific function. There is a characteristic clarity, warmth and beauty of sound which no other maker has been able to match. Intonation and flexibility have been brought to a state of perfection which has helped to create the highest standard of trombone playing ever, in all areas of activity.

Tuba

4886 Gold Plate
5886 Silver Plate

		cup diameter (mm)	rim width (mm)	bore (mm)	backbore	description	comparison
Single numbers (without 'L') are for older makes of European tubas with small mouthpiece fittings. 'L' models suit all modern instruments, especially German-type designs							
1	Extra deep cup/small fitting	32.50	7.48	8.43	open	For all large tubas. Enormous volume and range. Needs strong embouchure	No VB equivalent
1L	Extra deep cup/large fitting	32.50	7.48	8.43	open		
2	Very deep cup/small fitting	32.00	7.73	8.45	open	Large funnel-shaped Helleberg type cup. Clean and clear sound with good projection in all registers	VB18/Schilke 67
2L	Very deep cup/large fitting	32.00	7.73	8.45	open		
3	Deep cup/small fitting	31.25	8.11	8.78	large barrel	Deep well rounded cup and hugethroat and backbore give rich organ-like tone	VB24AW/Schilke 66
3L	Deep cup/large fitting	31.25	8.11	8.78	large barrel		
2SL	Shallow cup/large fitting	32.00	7.73	8.45	open	Soloist mouthpiece with tremendous projection and clarity in all registers	
3SL	Shallow cup/large fitting	31.25	8.11	7.62	small	Soloist model with brilliant tone and high register. Perfect for F tubas	Mirafone C4
4	Deep cup/small fitting	30.50	6.89	8.27	medium	Scaled down version of 3L. Good projection with less effort. Good for young players	No VB or Schilke equivalent
4L	Deep cup/large fitting	30.50	6.89	8.27	medium		
5	Deep cup/small fitting	30.00	7.14	7.89	medium	Deep cup and matching backbore give a compact ringing sound of equivalent great sonority. Suits F and Eb tubas	No VB or Schilke equivalent
5L	Deep cup/large fitting	30.00	7.14	7.89	medium		

Especially for the professional tuba player, new mouthpieces have been introduced to give even more volume and projection. They are a little more difficult to control, but the extra effort repays dividends. The inner rim contours are a little rounder for players who need to spend long hours in practice or performance. Much research has gone into the subtle reworking of the exterior shape to give even more powerful maximum dynamics and volume in all registers.

1XL		32.50	8.55	8.43	open	As 1L, 2L and 3L, but with wider, rounder rims	The rims are a little more comfortable and preferred by tubists who have to play for extended periods of time. Soft articulation is easier although there is slightly less "grip" in the very highest register.
2XL		32.00	8.60	8.45	open		
3XL		31.25	8.97	8.78	large barrel		

For Orchestral players, a breakthrough in mouthpiece design giving even more weight and producing a cleaner, clearer, richer sound.

2.5CC	For all tubas	32.00	7.20	8.60	V-type		
--------------	---------------	-------	------	------	--------	--	--

The range of Denis Wick Tuba mouthpieces covers every aspect of tuba playing from the solo work, the brass quintet, the brass band and the symphony orchestra. They all offer different compromises in richness of sound, flexibility and clarity. They are used by the best symphonic professionals and village bandmen alike. It is true to say that these mouthpieces have been largely responsible for the tremendous improvement in amateur tuba playing over the past 30 years in the UK, but Denis Wick tuba mouthpieces have enjoyed success all over the world.

Boosters

CORNET	TRUMPET	FRENCH HORN	MEDIUM BORE TROMBONE	LARGE BORE AND BASS TROMBONES	LARGE BORE AMERICAN FITTING
6180	6181	6183	6182S	6182L	6182LB

The DENIS WICK MOUTHPIECE BOOSTERS are cleverly devised attachments which can be fitted to existing mouthpieces of all makes, converting them into HEAVYTOP mouthpieces. Even very young players can sound like professionals! They are particularly useful for players who need to play in various styles and they can easily be fitted or removed.

Flugel Horn

4884 Gold Plate
5884 Silver Plate

cup diameter (mm) rim width (mm) bore (mm) backbore description

2F	Very deep cup	17.00	4.88	4.6	open	All these models give a particularly rich and beautiful tone to the flugel horn not found in any other make. Made for European flugel horns As above, with large fitting for USA and Japanese instruments As 2F As 2F As 2F As 2FL All these models have less deep cups than 2F, 2FL, 3F, 3FL, 4F, 4FL. They use the original DW cornet cups 2-5 and are intended for in Northern European 'Fanfare' bands where flugel horns replace cornets. May also be used by players who prefer more traditional flugel mouthpieces NB - these are NOT the same cups as the 'B' range of cornet mouthpieces Shank to fit copies of the popular Cuesnon jazz flugel A specialist model for jazz flugel Also designed by Roger Webster, these mouthpieces enhance all the positive qualities of the existing range giving a comfortable mouthpiece designed to give greater musical flexibility.

SFL	Large fitting	16.00	5.30	4.5	open	
RW2FL	Very deep cup	17.00	4.88	4.6	open	
RW3FL	Very deep cup	16.75	5.00	4.6	open	
RW4FL	Very deep cup	16.50	5.13	4.6	open	

The true flugel horn sound is not to be found on any other brass instrument. By using really deep cups and carefully matching throats and backbores, Denis Wick has created the real flugel horn tone quality that is possibly one of the most beautiful sounds ever made on a brass instrument. Flugel horn players can enjoy their own special sound with perfect intonation.

The HEAVYTOP models for cornet, trumpet and trombone use a completely different principle in not feeding back to the player the vibration of the instruments, transmitting all the energy through to the bell. This gives a much more powerful sound when needed, more security in the high register and more control and focus in all registers.

Trombone [5505] Bass Trombone [5509]

French Horn [5524] Baritone [5523]

Euphonium [5513] Tuba [5518]

All Denis Wick metal straight mutes are made from high purity spun aluminium, 'scotchbrite' finished and bright silver anodised. The well known 5504 and 5521 trumpet and piccolo trumpet models are now complemented by a new straight mute for D trumpet and Eb cornet. There is also a new model for alto trombone which also suits flugel horns with older type small bells. The Denis Wick straight trumpet and trombone mutes have a brilliance and carrying power which make them the choice of the world's finest professionals. The trombone and bass trombone models work perfectly in all registers and

are easier to handle than other makes. The french horn mute is widely respected amongst professionals and the euphonium is outstandingly the best available today. The baritone mute now completes the range of straight mutes for all the brass band instruments. The tuba mute has more clarity and is superior in all registers than any other so far developed. It is supplied with extra cork pieces to fit larger tubas. All Denis Wick straight mutes have excellent intonation and are well matched when played together.

CUP MUTES

Trumpet/Cornet [5531]

Soprano Cornet/D Trumpet [5537]

Trombone [5529] Bass Trombone [5533]

Denis Wick cup mutes have the perfect intonation that has become the hallmark of all Denis Wick mutes, with the added bonus that the cup position can be adjusted to give exactly

the desired sound quality - for microphone, solo, or section playing. The trombone and bass trombone models have absolutely no bad notes and respond evenly in all registers

EXTENDING TUBE MUTES

Trumpet [5506] Trombone [5507]

Bass Trombone [5508]

Denis Wick 'E.T.' mutes are well engineered 'Wow' mutes of traditional design. They all work well with tubes either in,

extended, or removed. The trombone and bass trombone models are particularly good in the usually difficult low register.

PLUNGER MUTES

Trumpet [5510] Trombone [5511]

Made in aluminium with hard PVC edges and flocksprayed interior, the Denis Wick plunger mutes are useful for jazz

effects and avant-garde music.

PRACTICE MUTES

Trumpet/Cornet [5526] D Trumpet/ Eb

Cornet [5534] Piccolo Trumpet [5532]

Alto Trombone/ Small Flugel [5535]

Trombone/Large Flugel [5527]

Bass Trombone/ Tenor Horn [5528]

Baritone [5536] Euphonium [5512]

French Horn [5530] Tuba [5519]

Denis Wick practice mutes are perhaps the best teaching aid ever invented. Not only do they fulfil the need for the IN TUNE painless practice, so essential in the development of every young player and an indispensable 'hotel mute' for the professional, but they also make possible an enormous

improvement in tone quality using the entire vital capacity as a vibrating air column by opening the throat spaces through playing loudly in the low register. They are a fraction of cost of the electronic practice mutes now available, which do not develop the sound in the same way.

STOPPING MUTE

French Horn [5525]

An essential part of every horn player's equipment, the stopping mute replaces the hand for the traditional 'hand-stopping' effect, giving a perfect result with an exact

semitone transposition every time. An absolute necessity for players with small hands and a great asset to all hornists.

WOODEN MUTES

Trumpet/Cornet [5551] Tenor [5558]

Trombone [5552] Bass Trombone [5553]

French Horn [5554] Baritone [5560]

Soprano Cornet/D Trumpet [5550]

Alto Trombone/ Flugel [5556] Euphonium

[5562] Tuba E Eb [5564] Tuba B Bb [5566]

It has been a closely guarded secret for many years amongst the best European brass players that wooden straight mutes give a very special tone colour, especially in soft playing because they must be hand-made, these mutes have always been expensive and difficult to find. By using new and

ingenious manufacturing techniques, it has been possible to produce these mutes at reasonable prices. Construction is of Finnish birch-faced plywood for the sidewalls and marine ply for the bases. All models have a lining of vulcanised fibre. **LATEST NEWS:-** Full range now available in stock.

For more than a quarter of a century, Denis Wick mutes have set standards of excellence that have made them the choice of the world's finest brass players. There are now mutes for most brass instruments, from piccolo trumpet to tuba. Brilliant straights, versatile cup and ET and innovative practice mutes, all beautifully made with perfect intonation.
